Fade in button code

The screenshot shows the Visual Studio Code editor with a CSS file named `infocss.css` open. The code defines styles for a button and its hover state. The `.layer` class is used for the button, and the `.layer:hover` class is used for the hover state. The `.layer` class has a width of 100%, height of 100%, position of absolute, top of 0, left of 0, and a transition of 0.5s. The `.layer:hover` class has a background color of `rgba(226,0,0,0.7)`. The `.layer h3` class is used for the button text, with a width of 100%, font-weight of 500, color of `white`, font-size of 26px, bottom of 0, left of 50%, transform of `translateX(-50%)`, position of absolute, opacity of 0, and a transition of 0.5s. The `.layer:hover h3` class has a bottom of 49% and an opacity of 1. The `.banner6 h1` class has a width of 100% and a color of `white`.

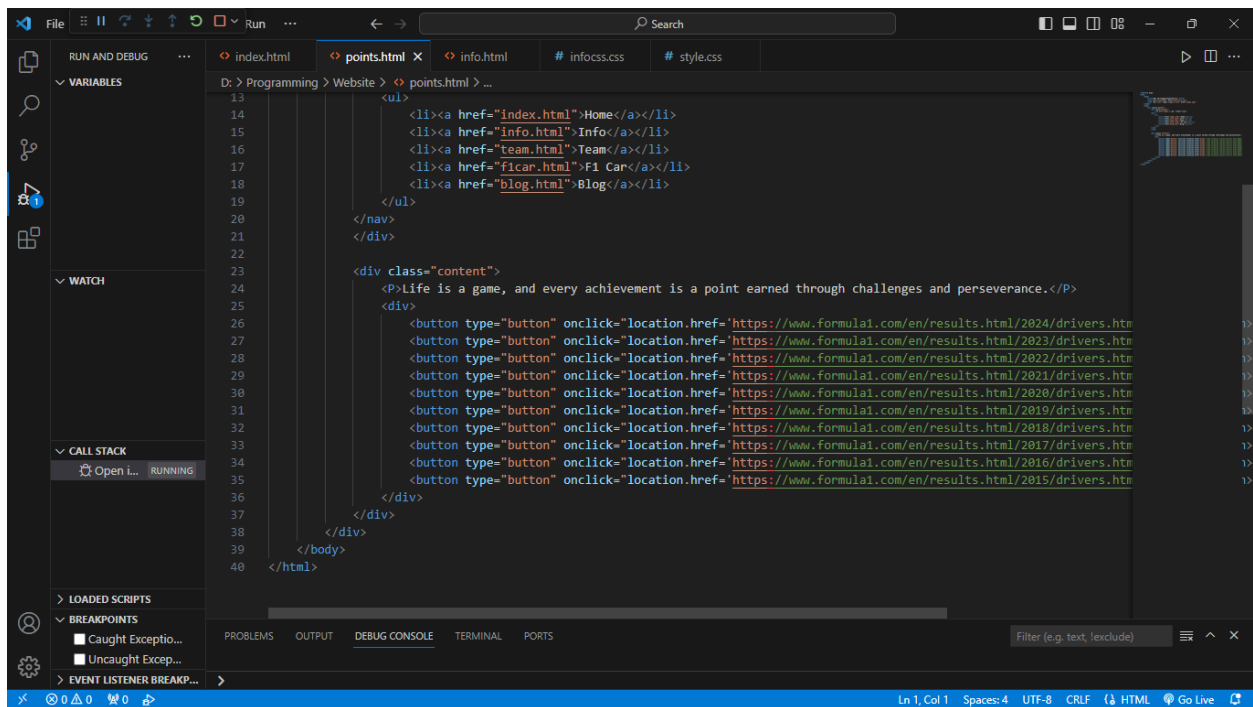

```
161     height: 100%;
162     width: 100%;
163     position: absolute;
164     top: 0;
165     left: 0;
166     transition: 0.5s;
167 }
168 .layer:hover{
169     background: rgba(226,0,0,0.7);
170 }
171 .layer h3{
172     width: 100%;
173     font-weight: 500;
174     color: white;
175     font-size: 26px;
176     bottom: 0;
177     left: 50%;
178     transform: translateX(-50%);
179     position: absolute;
180     opacity: 0;
181     transition: 0.5s;
182 }
183 .layer:hover h3{
184     bottom: 49%;
185     opacity: 1;
186 }
187 .banner6 h1{
188     width: 100%;
189     color: white;
190 }
```

The result.
