

Name: Christian Paul Tacis **Year/Course/Section:** 1-BSInfoSys-1 **Challenge #7:** Block, Inline, Class, and Id

The screenshot shows a code editor with a dark theme. The file explorer on the left shows a project structure with files like index.html, info.html, team.html, points.html, infocss.css, and style.css. The main editor area displays the HTML code for index.html. The code includes a navigation bar with a logo and links to Home, Info, Team, and two external links. The content area features a heading for Max Verstappen, a welcome message, and two buttons that link to points.html and a news page. The footer contains three banners: 'About Us', a summary paragraph, and a 'Contact Us' header.

```
18 <div class="navbar">
19

```

As you can see in the illustration above, I used block, inline, and class like `` to make my website easier to make. Learning this types of html code may gave you idea someday for web developing.
